

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claims 1-3 (cancelled).

Claim 4 (currently amended) A sunglasses holder, which is suitable for coupling a pair of sunglasses to an item worn on a head of a wearer comprising:

- a) a fixing member for attachment to the item;
- b) a connection member for attachment to the sunglasses; and
- c) hinges formed respectively in the fixing member and the connection member, each of the hinges having an axis of rotation and including at least one sidewall perpendicular to the axis of rotation, the sidewalls each having a toothed wheel formed therein, the hinges being rotatably coupled to each other by a hinge pin insertable through said hinges, and the toothed wheel of the fixing member hinge engaged with the toothed wheel of the connection member hinge, thereby enabling an adjustment of angle between the fixing member and the connection member,

wherein the hinge pin includes a male threaded portion corresponding to a female threaded portion of the connection hinge, and the hinge pin includes non-threaded portions that correspond to the fixing member hinge.

Claim 5 (currently amended) A sunglasses holder, which is suitable for coupling a pair of sunglasses to an item worn on a head of a wearer and can be carried in a disassembled state when not in use, comprising:

a) a fixing member including a body defining an interior space, the body including at least a first wall and a second wall each having a hole formed therein, a resilient piece coupled to each of the first wall and the second wall and having a button projected through the respective holes, and a fixing means for attachment of the body of the fixing member to the item;

b) a detachably-attaching member inserted into the interior space of the fixing member to be coupled with the fixing member, the detachably-attaching member having a resilient hook formed such that it can be released from the fixing member by pressurizing the resilient piece;

c) a connection member for attaching to the sunglasses; and

d) hinges formed respectively in the detachably-attaching member and the connection member, each of the hinges having an axis of rotation and including at least one sidewall perpendicular to the axis of rotation, the sidewalls each having a toothed wheel formed therein, the hinges being rotatably coupled to each other by a hinge pin insertable through the hinges, and the toothed wheel of the fixing member hinge engaged with the toothed wheel of the connection member hinge, thereby enabling an adjustment of angle between the detachably-attaching member and the connection member,

wherein the hinge pin includes a male threaded portion corresponding to a female threaded portion of the detachably-attaching member hinge, and the hinge pin includes non-threaded portions that correspond to the fixing member hinge.

Claim 6 (previously presented)      A sunglasses holder according to claim 4, wherein the fixing member includes a bolt, a support plate is integrally formed at both sides of the body, and the support plate has a hole for the bolt to pass through, thereby enabling a bolt coupling.

Claim 7 (cancelled).

Claim 8 (previously presented)      A sunglasses holder according to claim 4, wherein the fixing member is configured for attachment to an upper portion of the item.

Claim 9 (previously presented)      A sunglasses holder of claim 4, wherein the item is selected from the group consisting of a cap, a woolen cap, a jogging hair-band, a sports cap, a suncap, a sun visor, and a helmet.

Claim 10 (previously presented)      A sunglasses holder of claim 5, wherein the item is selected from the group consisting of a cap, a woolen cap, a jogging hair-band, a sports cap, a suncap, a sun visor, and a helmet.

Claim 11 (previously presented)      A sunglasses holder according to claim 5, wherein the fixing member includes a bolt, a support plate is integrally formed at both sides of the body, and the support plate has a hole for the bolt to pass through, thereby enabling a bolt coupling.

Claim 12 (cancelled).

Claim 13 (previously presented)      A sunglasses holder according to claim 5, wherein the fixing member is configured for attachment to an upper portion of the item.

Claim 14 (previously presented)      A sunglass holder of claim 8, wherein the item is a cap visor.

Claim 15 (previously presented)      A sunglass holder of claim 13, wherein the item is a cap visor.
